

# UN Sustainable Development Goals

We support the long-term vision of the United Nations Sustainable Development Goals (UN SDGs). We have identified eight goals which we positively contribute towards through our responsible investment strategy and core business activities: Goals 3, 6, 7, 8, 11, 12, 13 and 17. These will be continually reviewed in light of our evolving business and responsible investment strategy. We may focus on additional goals at portfolio level, depending on the strategy and asset classes.

We make a positive contribution to Goal 3 through provision of offices and workspace that enhance the wellbeing of our occupiers. We also support Goal 3 by protecting the health and wellbeing of our employees.

We support Goal 6 by setting minimum water efficiency standards as part of our new refurbishment standard and continuing to use our ESG asset tracker to reduce water consumption and increase recycling.

We support Goal 7 by procuring 100% renewable electricity for all landlord supplies, providing renewable energy generation on site wherever possible and clean energy will be a key component of our net zero carbon strategy.

We support Goal 8 by investing in our employees' wellbeing and development. Many of our assets under management provide high-quality office, retail and industrial accommodation across the UK that supports local economies, businesses and job creation.

We contribute to Goal 11 through our development and asset management strategy, including investment in local infrastructure, improvements to the public realm and sustainable transport solutions.

We support Goal 12 by reducing the environmental impact of our assets under management, targeting energy and water use. We are reviewing our procurement standards to prioritise the use of materials with a low environmental impact in refurbishments and developments.

We have completed a comprehensive analysis of our business climate risk and our total carbon footprint (scope 1, 2, and 3) in support of Goal 13. We have set a carbon reduction target, and this analysis will guide our roadmap to achieve net zero carbon status by 2030.

We contribute to Goal 17 by participating in global, cross-sector initiatives, and support industry organisations to positively influence the property sector. We are looking to partner with our supply chain on key sustainability issues going forward.
